

# Network Security

## Stay Ahead of Cyberthreat, Stay Secure.

As information passes through the corporate networks, robust network security appliances are of paramount importance. Transcend's DRAM modules offer high throughput to ensure the smooth transmission of large amounts of data. They provide ample memory space to manage current demands and accommodate future growth. Additionally, these DRAM modules are designed to adapt to various environmental conditions, thereby enhancing overall system reliability.

### High Speed & Sufficient Capacity

Support large amounts of data processing in low latency and offer large capacity for future growth.

### Low Error Tolerance

ECC mechanism to ensure high data integrity and system stability.

### High Reliability

Withstand a wide range of thermal change (0°C~95°C); 30 μ" gold finger enhances module durability.

## Featured Products

DDR4-3200  
Registered-DIMM

DDR4-3200  
ECC-DIMM

DDR5-4800  
Registered-DIMM

DDR5-5600  
Registered-DIMM
